

MCMC LECTURE SERIES

----- NO ADMISSION FEE -----

The Malaysian Communications and Multimedia Commission (MCMC) has initiated an Industry-University Research Collaboration initially focusing on spectrum related area as part of its efforts to grow knowledge alongside the rapid development to facilitate understanding of the complex regulatory environment and to leverage upon the opportunities in the field.

As part of the collaboration with the institutes of higher learning, the MCMC will hold the Lecture Series as follows:

- Topic : Evolution to Next Generation Mobile Network**
- Presenter : Mr. Paul Salmon, Head of Technology Development, Maxis Communications Bhd**
- Date : 17 August 2007 (Friday)**
- Time : 10.00 a.m. – 12.30 p.m.**
- Venue : Auditorium, MCMC**
- Synopsis : This lecture will explore the next generation mobile network vision and the likely challenges on the path forward. While it will be several years before the technology selection and standardization is ready for eventual deployment, it is now possible to catch a glimpse of the future. Aspects of the access and core networks will be discussed.**
